

GU10 LED LIGHT DIMMABLE

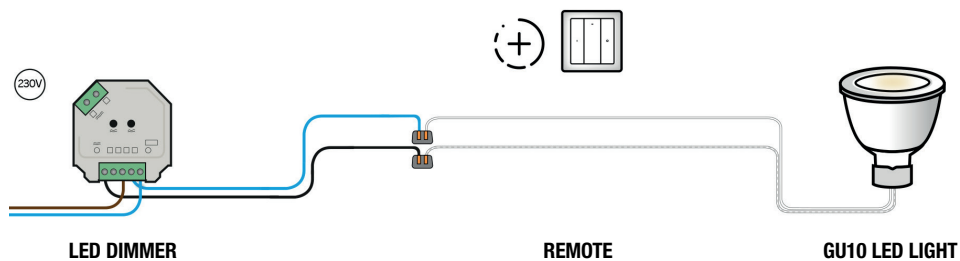

Yphix GU10 lamps are accessible in multiple versions, so you can always find the right LED replacement for your old halogen GU10 lamp. Thanks to the GU10 socket, the lamp can be connected directly to 230V, without having to use a transformer.

DIMMABLE WITH ZIGBEE

Choose the Yphix 230V wireless LED dimmer Zigbee to be able to dim your regularly dimmable lights smart. Easily controlled by an app with hub on your smartphone. It is also possible to add one of our wall remotes to your order, so the lights can be controlled without smartphone as well.
