

CONNECTING CABLES

BY CONDUCT

CONNECTING ACCORDING NEN1010:2015

Have you ordered a PV box for your converter? Then it is necessary to connect these to each other in the correct way. To make connection even easier and for it to proceed faster, you can order the right connection cables immediately.

By making use of these connection cables, which are supplied with the correct connectors, connection is ensured easily, safely and immediately.

SAFE AND QUICK CONNECTING

PV box connection cables are in particular available in the following lengths:

- **0,5 meter**
- **1 meter**
- **1,5 meters**
- **2 meters**

The thickness of the cables is 6mm², which can be ordered in the colour red or black. Are you looking for connection cables in other lengths? Then contact one of our enthusiastic employees!

How is the item number constructed?

Connecting cable Black
Connecting cable Red

Length in centimeters

PV.AKZ.MM.MF.0100

MC4 connector **Male**
Sunclix **Male**
Amphenol **Male**

MC4 connector **Female**
Sunclix **Female**
Amphenol **Female**

By using various connectors, it is possible to assemble the correct connection cables for each combination of PV box and converter.
